

Development environment

API v3

Production environment

API v1

API v2

**A bug
present in
API v1.**

```
graph LR; subgraph Development; D[API v3]; end; subgraph Production; P1[API v1]; P2[API v2]; end; P1 --> Bug[A bug present in API v1.];
```

The diagram illustrates a software development lifecycle. On the left, a box labeled 'Development environment' contains a single rounded rectangle labeled 'API v3'. On the right, a larger box labeled 'Production environment' contains two rounded rectangles: 'API v1' on top and 'API v2' on the bottom. An arrow points from the 'API v1' box in the production environment to a document icon on the far right. The document icon contains the text 'A bug present in API v1.' in bold.
